

Professional GPs
at your service

A new you?

*Want to feel revitalised and radiant?
Not sure if injection treatments are for you?*

Call Phoenix to arrange a free consultation. They can cover any questions you may have about your individual needs, and tell you more about the treatments available, how they will be carried out, how many procedures you will need to have, and what you can expect to see at the end of the course.

To arrange your consultation, please:

Tel 0845 456 5021

Email info@phoenixtreatmentcentre.co.uk

What to expect...

How long will treatment take?

This will depend upon the treatment required and the size of the area to be treated. Most treatments take 15 to 30 minutes but are not permanent. You will be advised of the appropriate time in between treatments at your appointment.

Will it hurt?

Treatments are non invasive and as such are relatively painless. Patients may feel some discomfort but local anaesthetics are available if required.

Will I need time to recover?

A slight redness around the treated area may occur immediately after treatment but this will fade within a couple of hours. You can return to your daily routine straight after treatment.

What results will I see?

During your full consultation, Phoenix will be able to assess your treatment and discuss the results you can expect to see. Before and after photos will be available so that

you can see how the procedure has worked in the past.

How much will it cost?

Since we tailor each treatment to the individual needs of the patient, costs do vary. We will discuss specific costs with you at your initial consultation once a treatment has been determined.

Enhance the appearance of your skin
without the surgery

What are Dermal Fillers?

The effects of age, sun exposure, smoking and stress cause fine lines and wrinkles to appear in your skin. Dermal fillers are injection treatments that are used to fill out these fine lines and wrinkles adding volume to your skin. Dermal fillers are most commonly used to reduce frown lines, smooth wrinkles and lines around the eyes and lips and to add volume and contour to the lips, cheeks and chin areas.

Dermal Fillers are injected through a very fine needle directly to the affected area instantly improving the suppleness and tone of skin. Depending upon the filler used the effects can last up to 6 months.

At Phoenix Treatment Centre we use a range of dermal fillers. Our qualified cosmetic practitioners will discuss these with you and recommend the most suitable for you.

Before - treatment with Laresse

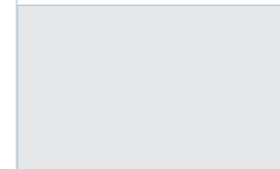

After - treatment with Laresse

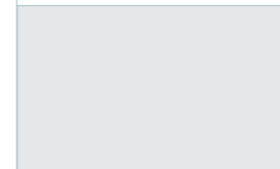

Laresse

Laresse is a new development in dermal fillers. Made from a scientifically advanced gel its ultra smooth texture results in a natural look and feel that can quickly invigorate your appearance.

Laresse is injected beneath lines and wrinkles and boosts your skins natural structure, smoothing out the skin and instantly reducing the appearance of lines and wrinkles. Treatment takes 15 to 20 minutes and the effects of Laresse can last up to 6 months.

Before - treatment with Restylane

After - treatment with Restylane

Before - treatment with Restylane

After - treatment with Restylane

RESTYLANE®

RESTYLANE provides a natural beauty lift using body's own material. RESTYLANE is a crystal-clear, non-animal, biodegradable gel based on a natural substance found in the body called hyaluronic acid. The gel is injected into the skin in tiny amounts with a very fine needle. The result is instantaneous and produces a long-lasting, natural enhancement, gentle and safe to your skin.

Restylane can be used to treat wrinkles or folds. The injected gel adds volume under the wrinkle which lifts and smoothes out the wrinkle or fold. Results can be seen instantly and enhancement can last 6 to 12 months.

Restylane can also be used to add volume and contour to the lips. Small amounts are injected to the inside of the upper and lower lips to add volume and along the lip lines to redefine the edge, which prevents lipstick bleeding and leads to a more youthful and appealing look.
